

Our Agile Analytics Lab makes it easy to experiment with **different models and methodologies** in an environment that is **secure, compliant and scalable**. We don't just provide servers, we provide a team of on-shore data scientists and technology experts to help **select** the best tools and methods, **set up and test** solutions, **analyze** results, and **transfer** the technology and insights to your team.

Achieving Agility Requires:

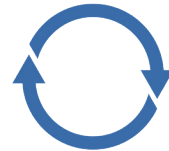

Exceptional People

Analytics expertise and big data technology experts to help with tool selection, PoC design, modeling, and data ingestion, tuning and scaling

The Right Infrastructure

Hardware: virtualized and on-demand
Software: automated configuration, secure and compliant

Repeatable Process

Fast procurement of modern platforms
Automated provisioning
Training and skill transfer

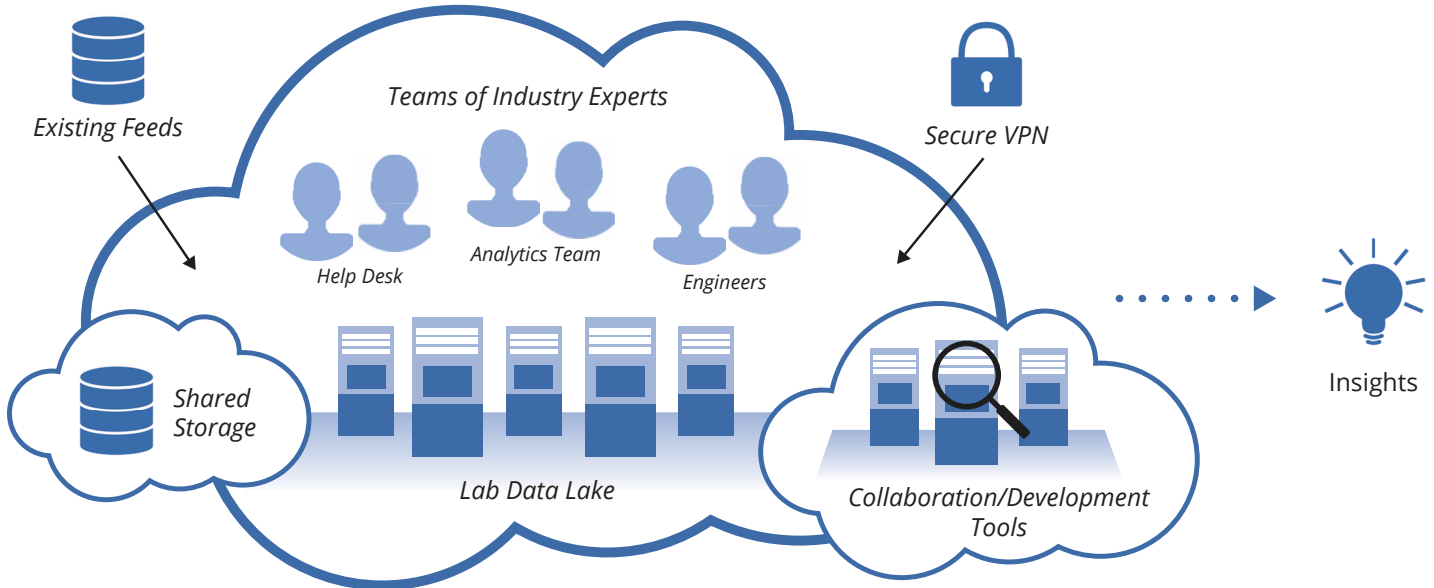

Our Agile Analytics Lab:

- Enables rapid evaluation of new software and methods
- Provides cost-effective access to non-production compute resources
- Allows combination of external data sources with your data assets
- Proves advanced analytical and big data use cases
- Hosted in a secure environment
- Prepares for scale, road-test configurations, and provides internal IT with production-ready specs

Why Agile Analytics?

Analytics software is advancing at an accelerating rate. Both public and proprietary new data sources are becoming widely available. New analytical and machine learning techniques are evolving quickly while business requirements change at a pace that exceeds the traditional processes.

Multiple Deployment Options and Flexible Business Models

Fulcrum Private Cloud

- Secure, private network, direct VPN access
- Hardware and software hosted and fully managed by Fulcrum
- Flexible, compliance with enterprise security requirements

Public Cloud (AWS, Azure)

- Cloud resources procured by Fulcrum or through enterprise agreement

On-Premise

- Fulcrum hardware specs, enterprise CapEx and hosting
- Remote bootstrap and management of Lab environment

Flexible Payment options

- Pay only for what you need and easily scale up or down as needed

Fulcrum Analytics

We have 25+ years experience in data science, data hosting, and app creation, all with the goal to make data more useful. Here at Fulcrum, we take a pragmatic approach that focuses on flexibility, custom tailored solutions, and practical data science resulting in actionable insights and applications that improve, not replace, large investments.
